Advanced data recorder and central display

The 9510-RTU unit can serve many uses throughout a facility. This low-cost central display - data recorder can provide HTML web pages and customizable displays to allow easy access to the data and provide E-mail alarming for critical information. This multi-functional unit supports communications to any Modbus RTU device and digital / analog I/O, allowing the 9510-RTU to provide solutions for many different applications.

**Features**
- Monitor breaker status changes with 1ms resolution
- Collect, log, and scale pulse inputs from water, air, gas, electricity or steam meters
- Act as an Ethernet gateway for serial devices
- Display Modbus slave information and make available as a web page
- Log and e-mail downstream Modbus device data
- Display trip unit data from WL, VL, Static Trip III and SB-EC devices
- Trigger and email alarms based on setpoint conditions
- Display feeder energy information for LEED certification
- Engineering service required to setup the 9510-RTU features.

1) Requires SPI-1000 as an interface.
Water, air, gas and steam monitoring
The advanced data recorder comes with digital inputs which can be configured for pulse counting applications where full utility monitoring is required.

Now gas, water, air and steam pulses can be collected in one unit logged and displayed. Up to 16 digital inputs can be added.

E-Mail capable
The advanced data recorder provides multiple communication interfaces, including serial, modem and Ethernet. With an Ethernet network card install, the 9510-RTU can send logged data via e-mail for storage and reporting on a remote PC.

Specifications
Up to 16 digital inputs:
• 8 Inputs: S1-S8, SCOM self-excited, dry contact sensing, no external voltage required
• Minimum pulse width: 1 msec
• Maximum pulse rate: 20 pulses/sec.
• Scan Time: ½ cycle
• Timing resolution: 1 ms
• Isolation: 300 Vpeak for 10s, 60 Hz.

Relays
• 3 relays: RT – R3
• Contacts: Form C
• Rated voltage: 250 VAC / 30 VDC
• Max. voltage: 380 VAC, 125 VDC
• Rated load @ 10 A AC/DC resistive, Rated voltage: 7.5 A (AC) / 5 A (DC) Inductive (p.f. = 0.4)
• Max. switching load: 2500 VA resistive, 1875 VA inductive (p.f. = 0.4)
• Turn-on time: 15 ms max
• Turn-off time: AC: 10 ms max, DC: 5 ms max
• Isolation: 5,000 VAC for 1 minute
• Lifetime: 10,000,000 operations (no load), 100,000 operations (rated voltage and load)
• Update time: ½ cycle or 1-second

Power supply
• Rated inputs: AC: 85-240 VAC/VDC (+/-10%) 47-63 Hz or 20-60 VDC (+/- 10%)
• Dielectric withstand: 2000 VAC RMS, 60 Hz for 1 min.
• Burden: Typical: 10 VA, Max: 20 VA
• Ride-through: Min: 100 ms (6 cycles @ 60 Hz @ 96 VAC) 200 ms (12 cycles @ 60 Hz @ 120 VAC), 800 ms (48 cycles @ 60 Hz @ 240 VAC)

Communications
COM 1
• Interface: RS-232E DTE (male DB9 connector) or RS-485 (captured wire connector)
• Duplex: Full (RS232E), half (RS485)
• Isolation: Optical

COM 2
• Interface: RS-485 (captured wire connector)
• Duplex: Half
• Isolation: Optical

COM 3
• Interface: IrDA compliant, or 33.6 kbps internal modem
• Duplex: Half
• Distance: 0-1 meter
• Optical range: +/- 15 degrees (min), +/- 30 degrees (max)
• Location: Front of meter (IrDA), com card (MODEM)

COM 4 (Network)
• Interface: IEEE 802.3-1993, ISO/IEC 8802-3:1993 (Ethernet) 10Base-T or 10Base-FL (optional)
• Cabling: 10/100Base-T unshielded twisted pair cable, 0.5 mm (24 AWG).
Max. length: 100 meters 100Base-FX Fiber optic cable, 62.5/125 um nominal, wavelength: 820 nm max. length: 2000 meters
• Connectors: RJ45 10/100Base-T, SC 100Base-FX
• Isolation: 10/100Base-T: Transformer isolated. Min. isolation voltage: 1500 VAC RMS/2250 VDC 100Base-FX: Optical
• Protocols: TCP/IP, Telnet, ION, Modbus TCP

**Internal modem**
- Data rate: 300 bps - 33.6 kbps (V.34, V.32 bis, V.32, V.22 bis, V.22 A/B, V.23, V.21, Bell 212A, Bell 103) Automatic data rate detection is supported
- Error Correction: V.42 LAPM, MNP 2-4, MNP 10
- Data compression: V.42 bis/MNP 5
- Interface: RJ11 (Tip and ring)
- Governmental approvals: FCC modem: FCC P68 (USA), Industry Canada CS-03 (CAN)
- CE modem: CTR21 (Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxemburg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, UK)

**Environmental conditions**
- Operating temp: -20°C to +70°C (no formation of ice) (-4°F to 158°F)
- Storage: -40°C to +85°C (-4°F to 185°F)
- Humidity: 5 to 95% non-condensing

**Internal memory**
- 5 meg standard, 10 meg optional

**Shipping**
- 7.1 lbs / 3.2 kg
- 17 x 10 x 11 inches (0.98 cu. ft.) 40.8 x 24 x 27.9 cm (0.0235 cu. m)

**Display**
- Type: FSTN liquid crystal display (LCD)
- Resolution: 320 x 240 pixels (1/4 VGA)
- Temperature: Display operational -20°C to +60°C
- Backlight: Cold cathode fluorescent (CCFT)

**Standards compliance**

**Safety/construction**
- IEC1010-1 (EN61010-1) Safety requirements for electrical equipment for measurement, control and laboratory use
- CSA C22.2 No 1010-1 Canadian Standards Association
- UL3111-1 measuring, testing and signal generation equipment

**Electromagnetic immunity**
- IEEE C.37-90.1-1989 IEEE standard surge withstand capability (SWC) tests for protective relays and relay systems (ANSI) (All inputs except for the network communication port)
- IEC1000-4-2 (EN61000-4-2/IEC801-2) Electrostatic discharge (B)
- IEC1000-4-3 (EN61000-4-3/IEC801-3) Radiated EM field immunity (A)

**Electromagnetic emission**
- FCC Part 15 Subpart B, Class A digital device, radiated emissions
- EN55011 (CISPR 11) Radiated/conducted emissions (Group 1, Class A)
- EN55022 (CISPR22) Radiated/conducted emissions (Class A)
- EN50082-2 Electromagnetic compatibility, immunity

**ISO 9002-94 Registration Cert# 0021886**

---

**Local display for WL, VL and sub-metering**

**9510-RTU as a master display / web server**

- IP Address: XXX.XXX.XX
- COM 1: Modbus Master
- RS 485: Baud: 19200

**9510-RTU for feeder monitoring**

**Connectors:** RJ45 10/100Base-T, SC 100Base-FX

**Protocols:** TCP/IP, Telnet, ION, Modbus TCP

**Note 1** – The infrared and modem connections cannot be operated simultaneously. The connection type is configurable.

**Note 2** – The listed modems are not suitable for European applications. Contact Siemens for special versions.
